DATA

Location Data

Information about the neighborhoods in Lisbon. This data set gives the different blocks and location. This will allows us to build a descriptive map of Lisbon.

Hospital Locations

For this project, I will use "Dados Aberto Lisboa" (http://dados.cm-lisboa.pt/) and Foursquare API to retrieve data on hospitals in Lisbon.

Dados Aberto Lisboa will provide information about administrative boundaries, zip codes, and population.

Additionally, I will use Foursquare API to find auxiliary information related to the health sector. This data will provide a better picture of the health needs in Lisbon different areas.
